Certificate on Utility Survey Results Accuracy Evaluation & Usefulness (Data Management for Professional Cert. only) for Inspectors, Engineers, Surveyors & Project Managers

管綫測量探測資料準確性評估及應用
 (及資料管理 - 只適用於達資課程)
 (適合操作員、工程師、測量師及工程經理等)

**Eligible for Application for HKIUS
 Membership**
**UTI has Over 500 students since
 launching at 2001**

Course Type	Date
Foundation Certificate Course (2 days_UTI) - 入門培訓課程	Please refer to website update.
Foundation Certificate Course (3 days_UTE) - 入門課程及考試	請留意網頁更新!
Professional Certificate Course (10 days_UTP) - 達資課程	

(7 hrs X 2/3/10-day)
9.00am to 5.00pm
total 14/18/84 hours

Introduction

Recently, a lot of underground utility survey have been taken part or still in the processing. Many surveyors, operators, Engineer representatives and Project Managers may have faced the following issues:

- ✧ Is the surveying specialist doing fine or would their submission under the required standards? What are the standards?
- ✧ What regulations should be followed? What should be surveyed? What can be surveyed? How accurate will be the survey results? How the results may be made use of?
- ✧ To tackle the issues, UTI is pleased to provide a 5 days training course for operators, Engineers, Surveyors and Project Managers working or will be working in utility related works for their better understand of the issues.

Participants who are the holder of the certificate issued by PolyU-SPEED in this course are eligible to apply for Competent Person (CP) under Cap406H, Electricity Supply Lines (Protection) Regulation.

此課程合格者並持有香港理工大學-專業進修學院發出的證書，將獲資格申請成為
 <供電電纜(保護)規例> (CAP 406H) 的合資格人士

Course Objectives

The course is designed to provide operators, engineers, surveyors & project managers in the construction related industries and facilities management services with essential theoretical and practical knowledge in Underground Utility Mapping to meet the increasing demand for high volume and quality utility mappings for preventive maintenance, design, permit to dig and new works.

Upon completion of the Course, students should be able to:

- ✧ have full understanding of role of utility mapping specialist, rules of and methods for utility mapping.
- ✧ prepare site raw data and report of utility mapping
- ✧ asset management systems using IDMS

Who should attend:

Operators, Engineers, Surveyors and Project Managers in consultants, contractors, government bodies in works related to utilities.

Course Contents:

Lectures

- ✧ Hong Kong's situation in utility survey industry
- ✧ Introduction of utility systems in Hong Kong
- ✧ Role of utility mapping specialist
- ✧ Rules of and methods for utility mapping
- ✧ Introduction of GPR survey for utility mapping
- ✧ Basic Land Surveying
- ✧ Introduction of IDMS utility mapping system
- ✧ Safety at work for confined space environment
- ✧ How to conduct QA/QC check
- ✧ Potential areas of dispute
